

Avir Natural Water Applications

Lake and Pond Accelerator

Avir Natural Water Lake and Pond Accelerator's safe, proprietary blend of active ingredients improves the dispersing speed of chemical additives and allows you to apply less chemical while achieving the same results.

A molecular reaction takes place in a water body when a chemical or natural product is added to solve a contaminate issue. *Avir Natural Water* Lake and Pond Accelerator dramatically reduces the surface tension of the water accelerating the rate at which a product comes in contact with contaminate.

By enabling a lake or pond owner to use fewer harmful chemicals, *Avir Natural Water* Lake and Pond Accelerator is the first step to all-natural water management.

- Biodegradable, safe formula
- No special equipment required
- Makes chemical application more efficient
- Can be mixed with chemical upon application
- Reduces the amount of chemical necessary
