

## Acidic Odor Control

*Avir Natural Air* Acidic Odor Control will neutralize strong acidic odors, mainly Hydrogen Sulphide, Methyl Mercaptan and other gases, associated with sewage and fatty wastes. It is also frequently used in industries where hydrocarbon odors are a problem. Specifically, compounds such as Benzene, Toluene, Ethyl benzene, Xylene, Naphthalene, and Polycyclic Aromatic Hydrocarbons. Examples of these types of industries are oil refineries, bitumen manufacturing for use in tar sealing roads, refining of natural gas, and contaminated soil remediation.

To reduce scum, oils and other fatty build-ups, *Avir Natural Clean* Acidic Odor Control has an emulsifying agent as part of its composition. This additive prolongs plant machinery and equipment life, and considerably reduces maintenance costs.

- Formulated for misters, foggers and automatic spray equipment
- Appropriate for direct dosing into liquid as well
- Animal and people friendly
- Non-volatile formula
- Industrial strength blend
- Economical ultra-concentrate
