

Bacteria Pellets Sludge Control

Avir Natural Water Bacteria Pellets were designed for the lake and pond market as a low-maintenance solution for sludge bed removal and beach clean-up.

Avir Natural Water Bacteria Pellets are fortified with specialized bacterial strains that are high volume waste consumers of muck and organic matter. These pellets have a broad trace mineral base and an organic catalyst to increase the productivity of the beneficial bacteria in each pellet. The pellet itself was specially designed to drive the active ingredients down to the sludge so the dose isn't consumed by the water column.

Avir Natural Water Bacteria Pellet's combination of natural technologies is a simple cost-effective method for continuous sludge management.

- Biodegradable pellet
- Contains sludge-eating bacteria, enzymes and trace minerals
- Improves water clarity
- Naturally eliminates odor-causing muck on beaches

Bacteria Pellets Sludge Control Application Guidelines

Application Rate

Usage: 125 lbs per surface acre: (3.0 lbs per 1000 sq ft)
Broadcast pellets uniformly over surface; Use 2-4 times per year.

For Optimum Results

- Use as directed
- Apply when ambient temperature is 50°-90° F; dissolved oxygen level is over 1.0 ppm; pH is 6-8 alkalinity is less than 100 ppm
- Use with other *Avir Natural Water* Enzymes, Bacteria and Phosphorous Reduction products for a full treatment program
- Proper aeration will enhance product performance

Technical Specs

In Use pH Range:.....Neutral
Solubility in Water.....Partially soluble
Odor.....Characteristic
Appearance.....Light tan pellets

Packaging, Handling and Storage

Size	Dimensions (LxHxW)	Weight
10 lb pail	12" x 12" x 12"	12 lbs
25 lbs	18" x 18" x 7"	28 lbs
50 lb bag in box	18" x 18" x 7"	51 lbs
40 bags per skid	48" x 48" x 24"	2000 lbs

Store this product out of direct sunlight in a cool dry area. For best results, use within 12 months. Request an *Avir Natural Water* Bacteria Pellets MSDS for more specific information.
